

ROOFING SOLUTIONS FOR SCHOOLS & ACADEMIES

When it comes to providing roofing and waterproofing solutions for today's educational establishments, TCRC are the team you can trust. With decades of experience in this sector, we have the knowledge to identify common roof issues, and the expertise to recommend and install the best long-term waterproofing solutions.

Flexible Working

Whether it's working to a tight deadline during holiday periods or arranging deliveries outside of school hours, TCRC have a flexible and considerate approach to delivering projects. We work closely with clients to carefully plan the schedule of works and wherever possible we will accommodate particular requirements in order to ensure that the project runs smoothly from start to finish.

Exceptional Health & Safety

Our top priority on any educational project is the safety and wellbeing of everyone connected to the building. This includes not only our operatives, but also the staff, pupils and any other people visiting the school. We therefore implement safe working practices at all times. In addition, all of our employees that attend educational sites carry enhanced DBS (CRB) checks and approvals.

The TCRC Promise

- ✓ **Knowledge:** Trusted, independent roofing advice

Protecting Budgets & the Planet

TCRC's competitive roofing and waterproofing packages can help schools, academies and universities to make significant budget savings. Our complete built-up roofing systems also incorporate highly efficient thermal insulation which can lead to regular reductions to heating and energy bills. Green roofs and photovoltaic energy systems can also be installed to make the final waterproofing solution even more sustainable for the planet.

We are also able to offer assistance with budgetary planning to help schools and educational establishments make the most out of their available funds. In addition, we provide a range of roof integrity testing services which enable us to get a true picture on how the current waterproofing system is performing. This allows us to base any subsequent recommendations on proven facts, often leading to cost savings and enabling budgets to go further.

Independent, Impartial Advice

TCRC's technical experts are on hand to provide a full site survey and specification service for all of our educational clients. Furthermore, our knowledgeable and impartial advice means that we are always able to match the most appropriate solution to each individual job.

Access to Wide Range of Solutions

At TCRC we are trained and approved to work with the UK's leading manufacturers of roof waterproofing systems. We have an extremely wide skill-set, with the ability to install all kinds of traditional and modern systems, including the latest flame-free technology which completely eliminates the use of naked flames during installation. We can also install a wide range of complimentary products, such as rainwater and drainage systems, soffit and fascia detailing, rooflights and more. Furthermore, all of the systems we install are supported by comprehensive warranties for complete peace of mind.

Carrying out regular maintenance on your roof helps eliminate the risk of early roof failure and ensures that any roof warranties remain valid.

The TCRC Team are experts in all aspects of roof maintenance, and offer a rapid response service to schools, and educational establishments. So why not let us take care of your roof and have one less thing to worry about?
